Overview

Experienced designer with expertise in Section 508 compliance and skilled in managing the design process from start to finish. Proficient in creating user flows, wireframes, and prototypes. Delivers visually appealing and user-friendly interfaces. Knowledgeable in the latest AI technologies with hands-on experience using AI models to create applications.

Experience

Jul 2022 – Current 📍 Herndon, VA
Product designer
Photoxpedia Studio

Developed a car search recommendation application using a Generative AI platform and AWS Bedrock to meet user needs and enhance the overall user experience.

Delivered engaging presentations that effectively communicated insights and ideas to stakeholders.

Conducted comprehensive research from inception to completion using Hotjar and Google Forms to gather insights and inform design decisions.

Utilized AI to create both high-fidelity and low-fidelity designs, streamlining the design process and enhancing creativity.

Jan 2020 – Jul 2022 📍 Fairfax, VA
Sr.UX design consultant
Nielsen IQ / Mediabarn

Created high-fidelity prototypes and wireframes using Figma, facilitating collaboration with cross-functional teams

Collected design requirements from clients, identified user personas, developed usage scenarios, and mapped user flows

Worked within established design systems and supported Agile development teams to ensure timely project delivery.

Engaged with Product Management, Engineering, Data Science/Analytics and Operations teams to align design strategies with business objectives.

Jun 2016 – Jan 2020 📍 Reston, VA
Sr.UX Designer
Oracle

Conducted primary and secondary research, created personas, user flows, scenarios, and wireframes.

Developed high-fidelity screen designs and animated UI walkthrough.

Created mobile app prototypes using HTML, CSS, and JavaScript

Designed and developed a web-based control panel for real-time mobile app content manipulation using WebRTC.

Sep 2015 – Jun 2016 📍 Reston, VA
UX Designer
Latista / Textura Corp

Redesigned the "Punch Walk" feature to "Quick Punch," reducing issue logging time from 7.5 minutes to under 15 seconds.

Revamped the Daily Reports feature, enabling comprehensive documentation of daily activities, RFIs, and incident reports.

Conducted user research, developed interactive prototypes, and led usability testing sessions to validate design decisions.

Enhanced user efficiency and satisfaction, resulting in significant productivity gains and improved legal documentation.

Education

MS in Engineering Management
South Dakota School of Mines and Technology
Sep 2010 - Dec 2012
📍 Rapid city, SD

BS in Information Technology
Mongolian Computer Sciene and Technology School
Sep 2000 - May 2004
📍 Ulaanbaatar, Mongolia
